Variable Requirements and Usage: Nicardipine

You can run Concomitant Medications Distribution with current dialog option selections.

Core Requirements

Used

For core (Load Data)

`Variable(s) needed:` `ADSL.USUBJID and CM.USUBJID`
`Variable(s) used:` `ADSL.USUBJID and CM.USUBJID`

For core (Term Variable)

`Variable(s) needed:` `CM.CMDECOD or CM.CMTRT`
`Variable(s) used:` `CM.CMDECOD`

Note: At least one variable that provides the intervention term value must be present. For EX EXTRT required.

Dialog Option Requirements

Used

For dialog option ("Merge supplemental domain" set to "Yes")

`Variable(s) needed:` `CM.STUDYID`
`Variable(s) used:` `CM.STUDYID`

For dialog option ("Select the analysis population" set to "Safety")

`Variable(s) needed:` `ADSL.SAFFL or ADSL.SAFETY`
`Variable(s) used:` `ADSL.SAFFL`

Note: SAFETY may be used in DM Supp.

For dialog option ("Treatment or Comparison Variable to Use" set to "Actual")

`Variable(s) needed:` `ADSL.TRT01A or ADSL.ACTARM or ADSL.TRT01P or ADSL.ARM`
`Variable(s) used:` `ADSL.TRT01P`

Note: Will attempt to use Planned treatment variables if Actual treatment variables not found. If ARM is missing, it will be created and set to "Blinded Treatment" so that certain reports can still be run.

Options

Missing

For core (Interventions Occurrence Check)

`Variable(s) needed:` `CM.CMOCCUR`
`Variable(s) missing: CM.CMOCCUR`

Note: Removes records with xxOCCUR = N

For output

`Variable(s) needed:` `CM.EPOCH`
`Variable(s) missing: CM.EPOCH`

Note: Variable will be available in Intervention Stacking, Data Filter, and Distributions.

Options

Used

For core (Study Day Calculation)

Variable(s) needed: CM.CMSTDY or (CM.CMSTDTC and (ADSL.RFSTDTC or ADSL.TRTSDT))

Variable(s) used: CM.CMSTDY

Note: Calculate relative Start Study Day variable STDY. Partial date imputes to first moment. Missing dates set STDY = 0

Variable(s) needed: CM.CMENDY or CM.CMDUR or (CM.CMENDTC and (ADSL.RFSTDTC or ADSL.TRTSDT))

Variable(s) used: CM.CMENDY

Note: If ENDY cannot be calculated, set to STDY.

For dialog option ("Merge supplemental domain" set to "Yes")

Variable(s) needed: CM.DOMAIN

Variable(s) used: CM.DOMAIN

Note: Additional requirements of domain depend on IDVAR values of SUPP file

For output

Variable(s) needed: ADSL.AGE

Variable(s) used: ADSL.AGE

Note: Variable will be available in Data Filter and Distributions.

Variable(s) needed: ADSL.SEX

Variable(s) used: ADSL.SEX

Note: Variable will be available in Demographic Grouping, Data Filter, and Distributions.

Variable(s) needed: ADSL.RACE

Variable(s) used: ADSL.RACE

Note: Variable will be available in Demographic Grouping, Data Filter, and Distributions.

Variable(s) needed: ADSL.SITEID

Variable(s) used: ADSL.SITEID

Note: Variable will be available in Demographic Grouping, Data Filter, and Distributions.

Variable(s) needed: ADSL.COUNTRY

Variable(s) used: ADSL.COUNTRY

Note: Variable will be available in Demographic Grouping, Data Filter, and Distributions.

Variable(s) needed: ADSL.STUDYID

Variable(s) used: ADSL.STUDYID

Note: Use like other demography only if multiple levels deteced indicating a multi-study analysis.

Variable(s) needed: CM.CMDOSE

Variable(s) used: CM.CMDOSE

Note: Used in Data Filter and shown in distributions.

Variable(s) needed: CM.CMCAT

Variable(s) used: CM.CMCAT

Note: Used in Data Filter and shown in distributions.
