

*SAS® Life Science Analytics Framework SAS Macro API 2.6.1  
Release Notes  
October 2022*

The SAS® Life Science Analytics Framework Macro API 2.6.1 is available for use with SAS® Life Science Analytics Framework Java API 2.6.1.

Starting with version 5.4.1, the SAS® Life Science Analytics Framework clinical functionality can be deactivated. The macros associated with that functionality are still available but will fail with unpredictable response if the used when the clinical functionality is deactivated.

<b>Functional Area</b>	<b>Description</b>
Audit	lsaf_get auditactions - The “downloaded” value added to the return data set when no lsaf_typeid is omitted or represents a file type (e.g. sas:pdf).
